AR081-001: Emerging Green Industries in Arizona: Definitions, Industry Base, and Opportunity Areas

Product Description

This is a research study report on industry trends in the emerging green economy with key findings about its current footprint, expected drivers, and opportunity areas for growth and development in Arizona. The report was developed as part of a broader effort of research studies, data collection efforts, and data dissemination initiatives to promote and improve dissemination of intelligence on the green economy in Arizona, assist the Arizona State Energy Sector Partnership grant initiative, and provide a foundation for future analysis.

AR081-002: Green Jobs In Arizona, 2010: A Survey Report from the State's Companies

Product Description

This is a report about the green economy in Arizona based on a survey of the state's companies. The survey was designed to produce baseline intelligence of Arizona's green economy, because very little systematic data existed about this segment of the state's overall economy. The survey produced key information about the number of green jobs in the state; the kinds of industries that employ workers requiring green skills; the kinds of occupations and attendant wages that were most prominent in its green economy; and the knowledge, skills and experience required of jobseekers to succeed in these occupations.

**AR081-003: Arizona Real-time LMI
Job Vacancy Report: Available
Green Jobs (May to October 2010)**

Product Description

This is a report about green jobs vacancies in Arizona. The vacancy report analyzes available green jobs in the state based on real-time labor market information data from Web-published postings by Arizona companies from May to October 2010. This period was chosen to roughly coincide with the period of the green jobs survey, which also elicited vacancy information from Arizona companies via survey questionnaire.

**AR081-004: Arizona Real-time LMI
Job Vacancy Report: Available
Green Jobs (March 2010 to March
2011)**

Product Description

This is a second report about green jobs vacancies in Arizona. Like its predecessor, the report analyzes available green jobs in the state based on real-time labor market information data from Web-published postings by Arizona companies. Compared to the first vacancy report, this report utilizes a longer time series spanning March 2010 to March 2011 to ascertain trends in available openings for green jobs relative to non-green jobs in Arizona. This report also provides wage information for green versus non-green occupations, as well as in-demand green occupations by industry clusters in the state.

AR081-005: Comparing Job Vacancy Surveys and Real-Time Labor Market Information Job Openings in Arizona

Product Description

This is a third report about green jobs vacancies in Arizona. Unlike the first two, this report is a technical research memo comparing the pros and cons of eliciting green jobs vacancies via survey versus real-time Labor Market Information methodologies. The technical memo compares and contrasts findings about green vacancies in the state based on the survey versus the real-time Labor Market Information produced in the first vacancy report and suggests significant factors explaining any divergence in results, concluding with lessons learned from this dual methodology vacancy elicitation exercise.

AR081-007: Emerging Green Industries in Arizona: Enhancing the Delivery of Workforce Information in Arizona

Product Description

This report is part of a broader effort of research studies, data collection efforts, and data dissemination initiatives by the Arizona Office of Employment and Population Statistics. The key objective of this initiative is to redesign the existing website (Workforce Informer) in order to increase its efficacy in disseminating labor market information to the public, including intelligence on green jobs. This report provides detailed recommendations for improvements to the current Workforce Informer website, based on feedback from focus groups conducted throughout the state.

AR064-009: Laborshed Study & Business Demand Occupational Survey

Product Description

The Iowa Green Economy Report is designed to provide a detailed examination of the labor supply and demand in Iowa's "Green Economy." The "Green Economy" can be defined as the economic activity related to reducing the use of fossil fuels, decreasing pollution and greenhouse gas emissions, increasing the efficiency of energy usage, recycling materials, and developing and adopting renewable sources of energy. Labor supply is based upon the knowledge, skills, abilities and experience of individuals who are in or could potentially be in Iowa's labor force; labor demand is based upon the skills that employers need their workers or potential workers to possess in order to fill green-related occupations.

<i>Product Number: Product Name</i>	<i>Product Description</i>
AR092-055: Mississippi Green Jobs Employment Projections Report	This report summarizes the methodology for developing a projection of green jobs at the one, two, five and ten year horizons based on the 2010 estimate provided by the Mississippi Green Jobs Survey. This consists of combining the survey results with the state's overall occupation projections and making adjustments to account for known changes in the coming years that are not captured by long-run trends. In addition, this report will provide a summary of the results with the key finding that green jobs are expected to grow at a rate faster than the rest of the economy across most industries.

AR092-071: Louisiana Current Labor Market Data Analysis

Product Description

This is a screen shot of a web-based tool to track the supply and demand of green openings including a chart that displays the monthly number of green job advertisements for the state as well as each of the 8 Regional Labor Market Areas (RLMA) in Louisiana. The tool contains a table that identifies green job openings at both the 2-digit SOC code and the 6-digit SOC code. This table provides information on monthly percent of green jobs, current green employment and a ratio of green employment to initial unemployment insurance claims for each occupation by RLMA or state.

AR091-029: Wyoming at Work Internet Browsers

Product Description

This study analyzes the differences in worker wages and retention according to their use of Wyoming Department of Workforce Services. Two groups of new hires were studied: one which used public workforce services (treatment group) and one that did not (control group). Although the control group exceeded the treatment group in retention outcomes, the research showed that wage differentials were negligible for jobs that were highly "green" in nature.

AR073-003: Part 3 Green Jobs and the Ohio Economy: The Workforce Skills and Training Ohio Green Industries Need

Product Description

The purpose of this research project was to learn more about workforce challenges in six targeted green industry sectors deemed important to the Ohio economy, including skills, training, or talent shortage issues. Survey results will provide guidance to schools, employment and training agencies, and workforce development organizations. The results will also assist companies and others in creating solutions to meet workforce challenges in the new green economy.

AR074-001: The Greening of Oregon's Workforce: Natural Resource Jobs and Employer Needs

Product Description

The Oregon Employment Department and the U.S. Department of Agriculture National Agricultural Statistics Service, Oregon Field Office partnered to complete a survey of employers in the state's natural resources industries. The purpose of our survey was to estimate, for each major sector: the total number of year-round and seasonal jobs; the number of green year-round and green seasonal jobs; information about green-related job activities; what skills employers have difficulty finding when hiring; and other information related to workforce training and development needs within Oregon's agricultural industries. The report is posted on www.QualityInfo.org/green as a PDF document, and abridged versions were placed on the Oregon Employment Department blog and Twitter page. The www.QualityInfo.org website averages over 80,000 visitors per month.

AR077-002: TN Green Investment Study

Product Description

Tennessee has been the recipient of six groundbreaking green industry investments with total estimated expenditure of \$5.5 billion. This report assesses the economic impact of these investments, as well as the expected number of direct, indirect, and induced jobs that will be created and retained as a result of these investments. It also reports on the estimated number of green jobs being created by the construction and operations phases of the projects.

AR089-006: Green Firm Identification

Product Description

This product is a portal on <http://public.greencarecentral.org/research> providing access to a report entitled "Green Firm Identification." After an in-depth analysis of the limitations associated with job postings, occupational classification proved to be the best strategy in understanding the green job market. The tool used to achieve the goal of identifying green jobs in a real time environment was the development of a green firms list by each Consortium member state.

AR089-007: Emerging Requirements

Product Description

This product is a portal, <http://public.greencarecentral.org/research> providing access to a report entitled "Skills Analysis." Online job postings offer a constant flow of authentic qualitative data in real-time. The Consortium proposed to create tools to identify skills and knowledge requirements for use by multiple stakeholders: job seekers, career counselors, workforce developers, educators and labor market analysts.

Product Number: Product Name

**AR089-010: Report on Projections
for Employment Demand**

Product Description

This product is a web portal, <http://public.greencarecentral.org/research>, providing access to a report entitled "Projection of Employment Demand Using On-line Postings Data." This is a research paper explaining the methodological development and production of baseline projections. The model demonstrates that it can accurately project trends, balance aggregating occupations to obtain geographic specificity, and use higher level geographic estimates to obtain more specific occupational estimates.

AR078-006: Web Site Usability Study

Product Description

This Web site documents information from a number of customer groups about specific ways to improve the organization and functionality of www.WorkforceExplorer.com. The goal was to enable customers to more easily find green economy labor market information. Major redesign recommendations include simplification of the home page, streamlined and persona-based site navigation, and plain language for report labeling.
